SORT DESCRIPTION

The Gladiator is ready with his weapons while an excited crowd is cheering loudly in anticipation. As the gladiator starts the battle, he jabs sword and swing maces and fights for his glory! Surrounded by the marvelous Ancient Rome world, the player will witness the supremacy of the impressive Colosseum and, through the fascinating arena, you will enjoy some intriguing battles. This game can definitely be defined as one of the best slots so far, also for its design, its great soundtrack and its excellent bonus features. The atmosphere is simply inimitable and so are the unique elements and symbols that will involve some unforeseen events! The Gladiator consist of 5-reels with multiple paylines.

1 GAME DESCRIPTION

Gladiator is a 5-reel, 3-rows, 10-payline game. The number of lines is fixed.

The different symbols on each reel pay (according to the paytable) if the same symbol appears in a line from left to right. For instance, if symbol KING appears on the first, second and third position of line 5, this is awarded as a 3-of-a-kind KING win. Only the highest win of each line is awarded, and all wins are added together.

The game has two mutually exclusive Bonus features:

- Freespin Bonus feature: triggered by 3, 4 or 5 SCAT symbols appearing anywhere on the reels, awards 5, 10 or 15 freespins respectively. Additional freespins cannot be won during bonus feature.
- Super Freespin Bonus feature: triggered by 3 BONUS symbols appearing only on reels 1, 3, 5, awards a random number of freespins (5, 8, 10, 20, 30) with a randomly chosen win multiplier (2x, 3x, 5x, 7x, 10x, 20x times the win on the line). Additional Super Freespins cannot be won during bonus feature.

3 RANDOM MODEL

In the base game the engine draws one random number in the [0-1) range to select a set of reels, then it uses 5 random numbers to select the stop positions for all 5 reels, each one of these numbers is drawn in the *[0, d-1]* domain where *d* is the length of the reel.

3.1 Freespins

If Free Spins Bonus is triggered, 5 random numbers will be used on every spin to select the stop positions for all 5 reels, each one of these numbers is drawn in the *[0, d-1]* domain where *d* is the length of the reel.

Example outcome with trigger: 0.3,6,3,4,1,1

3.2 Super Free Spin / Bonus

If the Super Free Spin Bonus is triggered, the engine draws one random number in the [0-1) range to select the number of freespins of the bonus according to the following table:

Prob. Ranges	N. Spins
[0 , 0.54]	5
(0.54 , 0.77]	8
(0.77 , 0.94]	10
(0.94 , 0.98]	20
(0.98 , 1]	30

Then the game will consume one random number in the [0-1) range to select the win line multiplier for the bonus game, according to the following table:

Prob. Ranges	Win Multiplier
[0 , 0.35]	2
(0.35 , 0.66]	3
(0.66 , 0.85]	5
(0.85 , 0.96]	7
(0.96 , 0.99]	10
(0.99 , 1]	20

On every spin the game engine will draw 5 random numbers to select the stop positions for all 5 reels, each one of these numbers is drawn in the *[0, d-1]* domain where *d* is the length of the reel.

Example outcome with trigger: 0.3,13,5,9,2,6

3.2 Gamble Feature

To draw the outcome of the gamble feature one integer random number (0=gamble won, 1=gamble lost) is used.
